

LL's MAGNETIC CLAYS

are the most effective, all natural, inexpensive way to assist in pulling toxic metals and chemicals out of the body. It utilizes the Earth's natural healing properties; saves hundreds, perhaps thousands of dollars; and can be done in your own home.

These synergistically tested formulas assist greatly in the removal of these poisonous toxins by using these unique clay/spice/herb bath detox formulas. These clay baths are safe and effective in releasing metals such as mercury, arsenic, aluminum, cadmium, environmental toxins, chemicals, radiation, lead, etc. when used as directed.

Metals and chemicals BLOCK the ABSORPTION of food and supplements, is an underlying causative factor in digestive problems, parasites, leaky-gut syndrome, allergies, depression, memory problems, etc. which then presents a 'body pollution' environment for all kinds of viruses and bacteria to enter which in turn relate to a myriad of diseases.

Many of LL's Magnetic Clay formulas "overlap", meaning that several formulas might do the same thing. With metal and chemical sensitivities most persons have allergies so where one formula may not work, another one is available. Call us to discuss which is the right clay for you on **703 726 1110**. (Toll Free 877-726-1110)

Note: LL's Magnetic Clay Products contain no volcanic ash.

What comes in each kit?

Our Clay kit contains 5lbs of LL's Magnetic Clay (dry), a packet of herbs/spices to mix completely with ALL of the clay, a drain guard and a comprehensive instruction sheet. Each kit will do 4 to 10 baths depending on the health condition. We suggest starting with one cup mixed clay and herbs in a tub bath or foot bath if you are in fair condition. Check the guidelines on the BeeWell website, www.thebeewellcompany.com and in the instructions or with your doctor.

FOOT BATHS

Instructions for Foot Baths are included. If one is elderly or has had a chronic condition, it may be well to start with foot baths and work up to a tub bath. Suggested for the elderly, crippled and more chronic conditions.

HEAD PACKS and CLAY BODY PACKS

These instructions are also included and are used for "brain fog" for persons with mercury in the brain, and also clay packs on special parts of the body (not recommended for facials). Packs are generally put on thick - about 2-3 inches!

CLEAN-UP

A Drain Guard is included with each Detox Bath Kit. This is a plastic fine sieve-like device that fits in almost any tub drain and as the clay water is released after the bath, it goes through this fine sieve which "catches" any clay particles so that it keeps your pipes free flowing. This is ample for 1 cup of clay formula at a time.

LL's Magnetic Clay Detox Baths

"Draws pollutants out like a magnet!"

Unique Clay Baths that have a negatively charged clay which magnetically pulls positively charged particles of chemicals and metals out of the body!

Magnetic Clay

Every day of our lives we are exposed to a countless number of chemicals and metals. Today there are over 70,000 chemicals being used in commercial production in the U.S. 65,000 of them classified by the Environment Protection Agency as potentially or definitely hazardous to human health. According to Steven Levine, M.D. and medical researcher..."The vast increase of chemicals in our environment, foods, and medicines has greatly altered the body's ability to rid itself of toxins."

Dr. Rapp, M.D. an allergist and environmental specialist in Scottsdale, Arizona and past President of The American Academy of Environmental Medicine states: "Everybody in this country needs to be detoxified, because we've become toxic dumpsites"

What makes LL's Clay offered by The BeeWell Company superior to other commercial Clays? LL's Magnetic Clay Baths are uniquely created to assist in removing the "causes", not just the "symptoms" of disease! The unique formulas involve negatively charged clay which, in its natural form, magnetically pulls positively charged particles of chemicals and metals out of the body.

LL's Magnetic Clay includes an unusual bentonite chosen from hundreds of clays for the most consistent results along with synergistically tested formulas of spices and herbs. Most bentonite clays on the market contain very high aluminum, some of them as much as 67% to 75%. LL's Magnetic Clay has less than .2mg/L and uses no chemical emulsifiers. In its natural state, this clay has tremendous "pulling power".
