

Oxygen Elements Plus

According to Ed McCabe in his book "Flood your Body with Oxygen", in today's environment we receive only about HALF of the oxygen that our bodies are designed to run on in order to experience dynamic health. By living in an oxygen-deficient environment and not feeding our cells the proper oxygen and nutrients needed for cleaning out toxins and wastes, our body fluids and blood can become dirty and toxic.

Oxygen Elements Plus supplies the body with a steady diet of oxygen, hydrogen, trace minerals, amino acids, and enzymes.

Oxygen Elements Plus is a patented product. Patents are not easy to get. The product to be patented must be truly remarkable and have unexpected benefits. Oxygen Elements Plus qualifies in both respects!

Your body can't use vitamins and minerals without hydrogen, oxygen and enzymes. If we keep doing the same things, our bodies are going to fall apart.

This is evidenced by the diseases running rampant on this planet. We live in a stressful world, eating over-cooked and processed foods. We throw in a multivitamin and think our nutritional requirements are fulfilled. You may be fooling yourself if you think you're healthy. Most of us think if we are feeling good, then nothing is wrong with our health. The reality is . . . we don't get the oxygen, minerals, and enzymes we need, nor the amino acids and electrolytes. It is imperative that we supplement our diets with all of these nutrients so that we can enjoy long, happy lives.

We need oxygen in our bodies. The air we breathe formerly contained 50 percent oxygen. But today, we only have about 20 percent in our air and there is even less in large cities. The medical profession has confirmed that most viruses, parasites, bacteria, fungus and pathogens are anaerobic—they CANNOT live in oxygen. If we are not getting enough oxygen, our bodies become fertile breeding grounds for disease.

One of the current "buzz" words in nutrition today is "hydrogen." The purpose of hydrogen is to give structure to the body. What do you get when you bubble hydrogen through vegetable oil? You get margarine! Now, imagine hydrogen without oxygen. Your cells could become like margarine. The technology used in Oxygen Elements Plus supplies the body with the appropriate hydrogen to create structure, balanced with oxygen to keep your cells supple and flexible.

Oxygen Elements Plus synergistically combines oxygen, hydrogen, minerals and enzymes that work together so that all the vitamins and other nutrients you ingest will be highly absorbed by your cells. You can spend more money on more products, or you can achieve the same results with just one bottle of Oxygen Elements Plus.

Enzymes are critical to life itself. You cannot live without enzymes. We are all born with a finite amount of materials in our bodies to create enzymes, and when we run out of enzymes, we die. Digestive enzymes obviously digest your food. Metabolic enzymes support your immune system and are critical to every function of the body. In the absence of digestive enzymes, food that is sitting in your stomach signals your body to convert metabolic enzymes to digestive enzymes just to digest your food. Oxygen Elements Plus contains metabolic and digestive enzymes to help alleviate this problem.

It takes approximately 11 months for the cells in your body to rebuild themselves. Think how healthy your body could become, if you gave it all the proper building blocks: water, oxygen and hydrogen, all the major and trace minerals, all the enzymes, amino acids, electrolytes and nutrients. Oxygen Elements Plus should be the cornerstone of your nutritional foundation -- the Crown Jewel of your health program!

Suggested Use

Shake well. Add drops to eight ounces of purified water or juice. Initially, we recommend you test your level of toxicity by using 3-5 drops of Oxygen Elements Plus once a day for 2-5 days. Gradually increase your product usage over a two to three week period until you are using a maintenance amount of 7 drops three times a day. For a therapeutic dosage, increase slowly to 21 drops three times a day and maintain this amount for one or two months before dropping to the maintenance amount.

Suggested Use for Children

Take 1 drop for every 10 pounds of body weight once a day. After two weeks, children over the age of 12 can take Oxygen Elements Plus twice a day.

Price

1 oz. Bottle \$29.95 + S&H
