Medicinal Herbal Formulas Made from Organic and Wildcrafted Herbs

LIVER CLEANSE DETOX CONCENTRATE

Your Liver is your blood cleaning filter. It protects you by cleaning your blood of toxic chemicals and poisons that are in your food, water, air and environment. Modern living and our modern diet overloads your Liver. It gets congested with thick, muddy, toxic sludge waste material that concentrates and ends up filling your Gallbladder with hundreds of stones and rocks.

Your Liver is so important because it keeps your body clean and alive!

Both the #1 and #2 causes of death are directly linked to the Liver. The #1 cause of death is Heart Attacks and Stroke caused by cholesterol blocking either coronary or cerebral arteries, killing the heart and the brain. It's the liver's job to filter this cholesterol out of your blood.

The #2 cause of death is Cancer. Everyone now agrees that almost all cancers are caused by toxic carcinogenic chemicals in our food, water and air. These poisons get into our bloodstream, kill our cells, create tumors, cause cancer and kill us. It's the liver's job to eliminate these poisons from our blood.

No one ever just gets sick. Disease doesn't just happen. It is created. And often diseases are created by a sick, weak, overloaded Liver. As your Liver congests, it can't do its filtering job. As it begins to back up you get a slow trickle of poisonous toxic waste entering your blood. This can go on for years causing all sorts of chronic aches, pains and illness. Eventually when it fails you get a toxic tidal wave of poison and now you're in deep trouble. Most experts agree, from Constipation and Cataracts to even Cancer, many diseases start first with a sick, constipated Liver.

Viral Hepatitis (liver-inflammation) has reached epidemic proportions. As if Viral Hepatitis A and B weren't bad enough, Hepatitis C has now infected millions of Americans, about 1 person out of every 50. There are now 6 different types of Viral Hepatitis and "C" is the #1 cause of liver transplants. 500,000 Americans this year will have their impacted Gallbladders carved out of their bellies. Some will die and the rest will have impaired liver function and digestion for the rest of their lives.

The healing power of Flushing, Detoxifying and Protecting the Liver cannot be underestimated in strengthening your ability to heal any illness and stay healthy.

METABOLIC ACTION AND BOTANICAL CHEMISTRY

The herbs in this formula are famous for their ability to stimulate, cleanse and protect the liver and gallbladder and rid the body of parasites. Milk Thistle contains many phytochemicals, three chief ones being silibinin, silydianin and silychristin. These 3 plant chemicals are often collectively referred to as *silymarin*. There are many ways in which these plant chemicals protect and heal your liver, too many for this catalog. But two main ones are *protection* and *regeneration*. *The phytochemicals in Milk Thistle actually strengthen the structure of the hepatocytes (liver cells) skin or membrane which prevents the penetration of known liver toxins.*

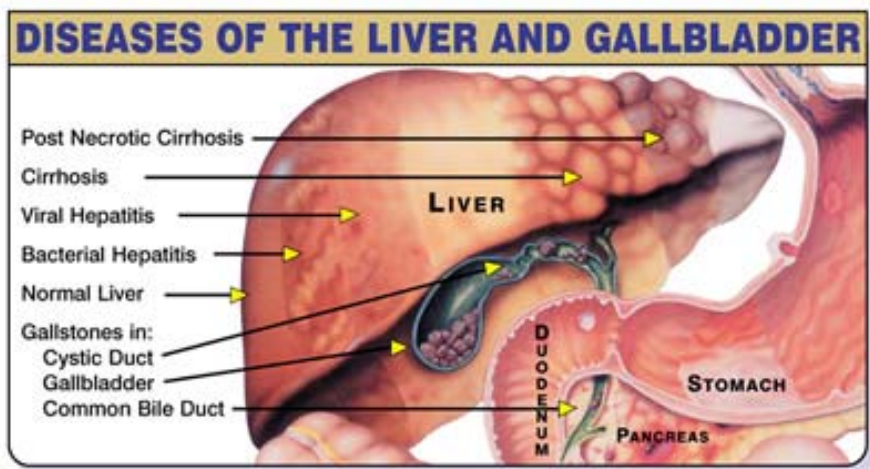

These protective chemicals also stimulate the action of the nucleolar polymerase A, resulting in an increase in ribosomal protein synthesis and thus stimulating the regeneration of damaged liver cells and stimulating the formation of new liver cells. These chemicals are so powerful they can even protect you from some of the most lethal poisons on the planet, like death-cap mushrooms. Simply put, ingesting Milk thistle is like putting a protective coating around your current liver cells while it also speeds up repair of damaged cells and building new strong cells.

Oregon Grape rootbark, Gentian root, Wormwood leaves and Dandelion root are some of the most bitter plants on the planet and all classic bitter liver

tonic herbs. They contain phytochemicals like berberine alkaloids and volatile oils which stimulate the liver to produce more bile which will flush out the bile ducts and gallbladder.

Black Walnut hulls, Wormwood and Garlic are strong anti-parasitical plants. Parasite infestation is a fact of life. One cubic inch of choice beef can have over 1,000 living parasite larvae waiting to hatch in your body. Over 65% of fresh fish tested had toxic levels of bacteria and parasites. Chicken is even worse. It works best if used in conjunction with both our Dr Schulze's Intestinal Formulas #1 and #2. Use if parasites are suspected or if there has been a history of bowel problems, constipation, eating of animal products, prolonged illness, disease and degeneration. If you have been exposed to any toxic substances, or drank alcohol or other harmful beverages, this formula is for you.

It is also beneficial if you have had high cholesterol, blood fats or any family history of liver or gallbladder problems. Many believe that anyone who has cancer or any immune dysfunction had a weak congested liver to begin with. Even if a person has had their gallbladder removed, these herbs will still be effective to clean the liver and bile ducts.

BOTANICAL INGREDIENTS

Made from Organic and Wildcrafted Herbs this powerful formula contains:

Milk Thistle seed, Dandelion root and leaf, Oregon Grape root, Gentian root, Wormwood leaf and flower, Black Walnut hulls, Ginger rhizome, Garlic bulb and Fennel seed.

HERB QUALITY

Obtaining top quality herbs is a vital first step. Therefore, 99% of the herbs we use are Certified Organically Grown or Wild Harvested. Certified Organically Grown means insecticide, pesticide and chemical fertilizer free. What's more, it means more potent because studies prove that organically grown food and herbs contain 4 to 10 times the plant chemistry, minerals, and nutritional value.

Wild Harvested means the herbs were picked in their wild native habitats. Herbs of such fine quality cost us a lot more- we do this because we hold quality and your health above all other interests.

In contrast, 95% of the herbs used in commercial herbal formulas you find in stores come from third world countries or areas such as India, Egypt, China, Eastern Europe and the like that still use tons of DDT, cancer-causing insecticides and toxic chemical fertilizers. The water in these countries often makes you sick. Why would you want to consume these herbs?

To make matters worse, imported herbs are normally irradiated or sterilized with toxic gas in order to decontaminate them of insects and germs commonly found in shipments from such places. The US Government is very efficient in seeing that these toxic "solutions" are used on commercially imported herbs!

Even Organic Herbs can be mis-handled to lose their valuable properties. The natural oils of the plants often contain their healing essences. These oils are often lost in the machine-driven industrial mass production techniques used by most manufacturers. The result: capsules full of dried herbal fiber with very low potency. This is a main reason why consumers see poor results in taking store-bought herbs.

Herbs are very powerful medicinal foods when grown, harvested and processed properly. The entire line of products at Southern Botanicals is hand made the old fashioned way. We fill our tonic brewing jugs full of herbs; after settling for a day, the herbal matter always takes up 2/3 to 3/4 of the container. Each batch is made to the maximum and we take pride in doing so!

RECOMMENDED DOSAGE:

1 to 2 droppersful (30 - 60 drops) plus one or more drops of Cayenne Concentrate 3 to 4 times daily for 1 week

2 Ounces liquid concentrate \$28.00 + S&H

Liver Cleanse Detox Tea**

Southern Botanicals

Medicinal Herbal Formulas Made from Organic and Wildcrafted Herbs

LIVER CLEANSE DETOX TEA

This tea has numerous health benefits; it is literally an all-purpose herbal tonic. First, it is based on a famous, ancient East Indian digestive tea formula. It is a powerful stimulant to the entire digestive process, especially the stomach, liver and digestive side of the pancreas.

This tea also cleanses the skin and detoxifies the blood, liver, and gallbladder. It stimulates your liver to produce more bile and then flushes away the bile and fats that congest your liver and gallbladder. It is an immune system tonic and also a mild diuretic and disinfectant to the kidneys and bladder and will cause you to urinate more within an hour after ingestion.

The formula contains Roasted Dandelion root, Burdock root, Pau d' Arco inner bark, Cinnamon bark, Cardamon seed, Licorice root, Fennel seed, Juniper berries, Ginger root, Clove buds, Black Peppercorns, Uva Ursi leaves, Horsetail herb, Orange peel and Parsley root.

Ginger root, Cardamon seed, Fennel seed, Cinnamon bark, Black Peppercorns and Clove bud are famous classic digestive herbs. They are extremely effective and have been a part of traditional Chinese, Indian, European and American herbal medicine for centuries. They are specifics for dyspepsia (basically gas), cramps, colic, bloating, indigestion, heartburn, and nausea. They contain essential oils which stimulate ALL aspects of digestion from saliva excretion and digestive juice stimulation to antispasmodic and even stimulate the villi of the small intestine for better assimilation.

Cardamon seeds, Roasted Dandelion root, Burdock root and Orange Peel all stimulate the liver to excrete more bile. While Cardamon has essential oils that cause this hepatic action the three later herbs all contain bitter hepatic stimulating phytochemicals. Dandelion and Burdock also stimulate the kidneys to excrete more urine along with the Horsetail herb and Parsley root. Juniper berries and Uva Ursi leaf are also diuretics and urinary tract disinfectants. They make you urinate more and destroy urinary infections. Pau d'Arco inner-bark is a classic South American Immune stimulant and Licorice root is soothing and healing to the lining of the entire digestive tract.

RECOMMENDED DOSAGE:

Drink 1 cup 3 to 4 times daily for 1 week.

For maximum effect drink this Tea with 1 to 2 droppersful (30 - 60 drops) of our Southern Botanicals Liver Cleanse Concentrate plus one or more drops of Cayenne Concentrate.

3.5 Bulk tea \$16.00 + S&H
