

What is HMD?

HMD™ has been formulated from extensive scientific and clinical research to prove its effectiveness in eliminating heavy metals from the body through oral chelation.

HMD™ is the only natural, patent-pending, toxic metal chelator in the world to be backed by a 3-year, double-blind, placebo controlled study with 350 people working in a metal foundry. There were many trials conducted over this 3-year period that show conclusively that HMD™ works effectively at eliminating all metals including **Aluminium, Antimony, Arsenic, Beryllium, Cadmium, Lead, Mercury, Nickel, Thallium** and **Uranium** without removing the good, essential minerals from the body. Absolutely no adverse side-effects or damage to organs, glands or immune system such as is possible with DMSA, DMPS & EDTA chelation were reported.

This research has been published in a peer-reviewed journal of Biological Medicine called Explore. The complete article is available on the **Beeline Links** Page under **Natural Cures**.

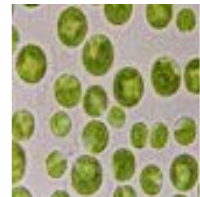

What are the ingredients in HMD™

It is a proprietary synergistic blend of three natural ingredients combining: Chlorella Growth Factor; a homaccord of specially energized cell-decimated Chlorella; and Organic Coriandrum sativum leaf. (Cilantro Leaf)

What are each of these three ingredients and what are their benefits and value? The three individual elements that HMD™ consists of are all natural substances, which apart from their chelating properties also have many health benefits:

1. Chlorella Growth Factor (CGF)

CGF is obtained by hydrothermally extracting premium quality chlorella. Chlorella Growth Factor (CGF) derived its name because laboratory test indicated that the addition of CGF to a standard growth medium increased the growth of friendly bacteria, lactobacillus, by up to 400%. CGF is a nucleotide-peptide complex and in addition to playing a synergistic role in the chelation of metals, as used in HMD™. It has been tested by independent labs to be 100% pure and heavy metal free.

CGF has been shown in various research studies to have many other benefits such as:

- Stimulates growth of all cells
- Builds and modulates the immune system
- Liver protector and regulates liver and kidney functions
- Improves cellular efficiency and integrity
- Helps to detoxify xenobiotics
- Quick recovery from exercise and disease
- Mitigates some side-effects of chemo and/or radiation
- Can lower blood sugar levels
- Combats damaging free radicals
- Enhances production of interferon
- Accelerates and enhances the re-growth of damaged tissue
- Activates cellular functions and increases metabolism.
- Activates protein synthesis and normalizes fat metabolism
- Increases growth of beneficial bacteria in colon up to 400%
- Enhances RNA/DNA functions for energy at the cellular level
- Helps you to resist the effects of premature aging
- Strengthens and improves hair, skin, and nails

2. Homaccord of Cell-Decimated Chlorella

The Chlorella was made into a homaccord of different (C) potencies. It goes through manual and not mechanical succession for highest vibrational frequency. Available literature is full of data about chlorella purporting to detoxify heavy metals. Homeopathic chlorella was tested based upon initial results using homeopathic plumbum, arsenicum, antimonium and cadmium. These homeopathics did appear to have some chelating properties to the specific metal that they represent, probably based upon their resonating properties, but not all the others.

When homeopathic chlorella was tried by itself there was no chelating effect. But when combined with the other natural remedies in this formulation there was a powerful synergistic effect.

3. Coriandrum sativum (leaf) herbal tincture, commonly referred to as Cilantro.

A researcher named Dr. Yoshiaki Omura, using bioenergetic measures, discovered that some patients excreted more toxic metals after consuming a Chinese soup containing cilantro. Cilantro has been well-researched and has been found to have the following benefits:

- Blood sugar lowering properties
- Anti-inflammatory properties - contains flavonoids including quercetin
- Free radical scavenger and prevents lipid peroxidation
- Antimicrobial properties due to its rich volatile oils

The organic Cilantro leaf tincture used in HMD™ is made by a master herbalist through a percolation process to assure purity, potency and essential oil content for ultimate health benefits.

Dosage (Adults)

HMD can be taken orally over a period of time without any side effects in order to gently but effectively eliminate toxic metals while maintaining beneficial elements. It has been shown to successfully eliminate lead, antimony, arsenic, cadmium, mercury and other toxic metals without eliminating essential minerals from the body. Always be aware that in any "detoxing or cleansing" processes, doing too much at one time or moving the toxins too quickly may cause reactions.

40 drops morning
50 drops lunchtime
60 drops dinner

Dosage (Children)

Two studies with autism have shown great promise and HMD is considered safe for children with no side-effects. The following dosages are recommended by the manufacturer:

1-6 years old Morning 10 drops; lunch time 12 drops and dinner time 15 drops
7 + years old Morning 20 drops; lunch time 25 drops and dinner time 30 drops
11 to 12 years old onward can take the adult dosage

HMD Heavy Metal Detox 4 oz Bottle (Approximately 1 month's supply) \$59.95 +S&H
