

WHICH CLAY DO I NEED?

The baths are an untreated, unaltered product, used for thousands of years utilizing the Earth's natural healing properties. They are combined with formulas of all natural spices and herbs that have been synergistically tested as well as specific testing for amounts to maximize the effectiveness of each formula. All the clays have been tested to demonstrate that metals and chemicals are removed through the use of these special formulas.

The following formulas have been designed for the detoxification of specific metals, chemicals, pollutants etc. If you are unable to identify the appropriate formula, give us a call to discuss what's right for you, 703-726-1110.

ENVIRONMENTAL DETOX: This bath is for pollutants, insecticides, pesticides, vaccination poisons, industrial pollution, chemical warfare, and almost all chemicals including food additives, chlorine, etc. Also used for nickel and other metals not covered by the other formulas. This is very helpful in radiation and lead, and some mercury detoxification.

DENTAL/MERCURY I DETOX: This kit is for assisting and focusing on clearing of dental/mercury poison from amalgams, fish and vaccinations.

MERCURY II DETOX: This kit is for assisting and focusing on clearing of dental/mercury poison from the brain and from the gut, along with removing methyl mercury and overall mercury in the body.

SMOKER'S/DRUG DETOX (Also known as Cadmium Detox) : This formula assists in removing toxins found in cigarette smoke (cadmium), tobacco, drugs,, and medical drugs or recreational drugs, smoke inhalation, etc. It is effective to release toxic substances found in tobacco such as tar, hexadecane, hydrogen cyanide, nicotine, lead and arsenic.

ARSENIC DETOX: A formula that assists in removing toxins found in pesticides, industrial pollution, water supplies, and also addresses chemical wastes, assists in removing arsenic and arsenic of lead, etc.

ALUMINUM DETOX: This kit helps remove toxic aluminum found in aluminum cans (cola drinks), cookware, aluminum foil, antacids, automotive exhaust, American cheese, milk products, table salt, toothpaste & deodorants. Also assists in releasing chemical residues.

TOX-AWAY DETOX: This kit is a general detox bath to help remove metals. This formula has an herb in it known to help detoxify the liver.

CLEAR-OUT DETOX: One of our newer formula and the spices and herbs in this are known for various situations that are present with metal and chemical poisons, such as digestive problems, parasites in the body, depression, etc. This bath also addresses the following metals: lead (lead poisoning), arsenic, mercury and aluminum poisoning. This formula is a great bath for a general detoxification.

COPPER& LEAD DETOX: Copper is viewed in two ways. The first is a detrimental heavy metal accumulated in the system by drinking water from sources with copper plumbing. The second is that a lack of copper causes a form of anemia. Many doctors in the

alternative field feel it is an important mineral. According to one doctor, copper levels are restored through the addition of chlorophyll.

Lead may enter the body through ingestion, inhalation, or skin eruptions. Adults normally absorb 5-10% of ingested lead. Children can absorb up to 50%. Biochemically, lead appears to be an enzyme poison. Saturnine gout has been connected with lead at levels as little as 1 ppm.

FORMALDEHYDE DETOX: This chemical is a colorless, strong-smelling gas present in a variety of products. This bath detox focuses on assisting in the removal of formaldehyde with the specially selected herbs and LL's Clay. We suggest using Zeolite Clay from our Blessed Bath line that also is known for removing formaldehyde and together one can clear the toxins in a quicker manner.

RADIATION DETOX: This silent killer is everywhere present and we are daily exposed to it in our technical world and in our atmosphere. We have special herbs and spices in this formula specifically addressing the removal process of radiation from the body. Radiation in excess results in flu-like symptoms and definitely affects the throat or thyroid area as well as other areas of the body.

Many people like to see the results of the bath of the toxins being pulled into the clay from their own body. These can be seen with Clear-Out, Smoker's/Drug Detox, Dental/Mercury Detox and Aluminum, Copper & Lead Detox. The Tox-Away, Arsenic, and Environmental formulas all have activated charcoal (black powder) and one cannot see the results in those formulas but many feel the results.

If you are undecided, use the Clear-Out bath. It is a bath that is for general detox use.

Each bath kit contains 5lbs of LL's Magnetic Clay (dry), a packet of herbs/spices to mix completely with ALL of the clay and a comprehensive instruction sheet. Each bath kit will provide between 4 to 10 baths depending on the health condition. We suggest starting with one cup mixed clay and herbs in a tub bath or foot bath if you are in fair condition.

Ingredients for all of LL's Magnetic Clay baths. If you are allergic to any one of these ingredients, please call and we will tell you which bath not to use.

Arrowroot, Basil, Bladderwrack, Burdock Root, Butcher's Broom, Cardamom, Charcoal, Chlorella, Cilantro, Cinnamon Cloves, Dandelion, Fennel, Garlic, Gingko, Hyssop, Kelp, Marshmallow, Myrrh, Oat Flour (only in the Arsenic Formula) Paprika, Peppermint, Red Clover, Rosemary, Sage, Shavegrass, Shepherd's Purse, Thyme, Turmeric and Special Clay.
